

GET THE INGERSOLL ADVANTAGE

CUSTOM SOLUTIONS, QUALITY CARE

Our team has over 75 years of combined experience in lighting, energy solutions, and facility management. We hold the key to exclusive national relationships that provide a seamless process from bidding to final installation.

ENERGY EFFICIENT AND ENVIRONMENTALLY CONSCIOUS SOLUTIONS THAT MAKE SENSE

Ingersoll Lighting provides energy efficient and environmentally conscious LED lighting solutions. We have a history of success in delivering cutting-edge technologies that produce energy savings, improved lighting, and extended lifespan with less maintenance. Our experienced team provides the most innovative products, efficient project management and installation, and the best financing solutions to fit your needs.

INTERIOR LIGHTING

Energy savings with an improved quality of light make interior LED lighting upgrades an easy decision. LED lighting updates are the easiest way to reduce your building's energy usage.

- Reduce energy usage by 50-80%
- Eliminate maintenance costs
- Produce a long-term savings, over 10 years in certain cases
- Improve quality of light for employees and customers
- Achieve a life rating range of 50,000-100,000 hours
- 1.5 years average ROI

EXTERIOR LIGHTING

Upgrading your exterior lighting to LED lighting is a great way to improve and secure the exterior of your facility, making it safe and secure while saving money in the process.

- Reduce energy usage by 50-80%
- Eliminate maintenance costs
- Produce long-term savings, over 10 years in certain cases
- Improve security and safety
- Brighter, even lighting coverage
- Achieve a life rating range of 50,000-100,000 hours
- 1.5 years average ROI

BUILDING ENVELOPE

Improve the bottom line of your company through the use of full building envelope energy-saving solutions. Our strategic partnerships enable us to identify and implement solutions ranging from solar, HVAC, drivers, rooftops, controls and more.

Solar Panels are an innovative and efficient way of reducing energy consumption while enhancing your brand in a consumer-driven environment that's increasingly focused on going green.

- Take advantage of predictable solar energy costs
- Reduce your carbon footprint
- Attract eco-conscious consumers
- Earn federal tax credits of 26% of project costs

PROVEN PROCESS, EXCLUSIVE SAVINGS

Ingersoll has the experience and expertise to maximize your energy savings and long-term return. Whether retrofitting your current fixtures or providing a complete upgrade with new fixtures, we tailor our lighting solutions to your needs.

A PROVEN PROCESS OF SUCCESS

From introduction to installation, our team delivers a straightforward process that takes the guesswork out of your energy and lighting needs. Relationships are important to us; we provide one point of contact to deliver stress-free turnkey solutions to our customers.

DISCOVERY CALL Discovery calls are scheduled to help us identify your lighting needs, whether that is improving lighting levels, reducing energy costs, or designing new layouts. Our team will meet with you to make sure we understand your project goals.

LIGHTING AUDIT This process is one of the most important steps in a project. As a consultant we'll come to you, walk side-by side through your facility to get an in-depth analysis of your current lighting usage and applications. We then prepare a comprehensive summary with a customized comparison of lighting and energy upgrades, including a financial breakdown of Payback and ROI as well as Annual Savings.

CUSTOM SOLUTIONS Every project has its unique set of needs and solutions. With our exclusive relationships we can offer technology comparisons among vendors, the best installation rates and turnaround time, and wholesale financing. Our nationwide relationships enable us to find you the best energy solutions with factory direct preferred pricing.

PROJECT MANAGEMENT From start to finish we will handle all the details. With your customized solution we will create clear and concise project goals, establish a performance baseline, define responsibilities, keep the project on time and maintain healthy communication throughout the project.

LONG STANDING PARTNERSHIPS

With over 75 years of combined experience in working with facilities and lighting, we have built long-term relationships with the best vendors across multiple industries; Labor, Finance, LED Suppliers and Manufacturers, and Building Envelope. Our comprehensive network of installers spans throughout the U.S., enabling us to meet quick turnaround times and achieve exclusive low rates.

NO HASSLE WARRANTY GUARANTEED

Our warranties range from 5-15 years depending on the application. The benefit of our warranty process is the ease of fulfillment.

Our products are warranted for the period, as specified, from the date of purchase against defects in material and workmanship. If this product should fail to operate due to defects in material or workmanship, we'll send you a new one right away.

I have known and worked with Todd Ingersoll and his Ingersoll Lighting team for the past 8 years on countless lighting projects for our clientele. They are a company we trust introducing to our customers because they work with integrity and are solution-minded. I highly recommend partnering with Ingersoll Lighting as either a customer or partner!

STRAIGHTFORWARD SOLUTIONS

TURNKEY SERVICES

Energy and lighting upgrades shouldn't add stress to your business. Ingersoll Lighting offers total turnkey packages that make your solutions straightforward, without adding anything to your to-do list.

BUILDING & LIGHTING AUDITS

Our complimentary large-area lighting audit guarantees that you know what you're getting from the start. We schedule a time to walk through the entire facility gathering information such as hours of use, current fixtures and bulbs, and the desired conditions for each area. Once we have gathered all this information we are able to compile the best solution for your company's needs.

PHOTOMETRICS

Photometric layouts allow us to get an in-depth look at the way LED lighting will be applied and distributed within your facility. We apply the specs of the lighting solutions to the environment to see the actual impact and work toward fulfilling your project requirements. Our photometrics will allow you to see the exact impact and distribution of the lights, making any desired adjustments before installation occurs.

FINANCING

Ingersoll Lighting offers a comprehensive finance packet, which allows you to invest in energy savings with zero capital. When utilizing a comprehensive solution, 80% of lighting energy savings is applied to a term. This means installing lights will deliver an instant net positive to your cash flow while having the lights pay for themselves. Our financing network can provide a range of additional customized solutions from zero capital packages to integrated utility bill funding.

INSTALLATION

When working with Ingersoll Lighting, you are connected to a network of other partners to help provide turnkey solutions for your LED lighting upgrade. We are partnered with installation teams across the nation so we are able to service your building anywhere in the U.S.

ENERGY REBATES

We maximize your utility and third-party rebates, handling all the details. This relieves you of the stress that comes with managing paperwork to gain access to these funds. We also show you the immediate impact these rebates can have on your project, saving you as much money as possible in the up-front cost and long-term return.

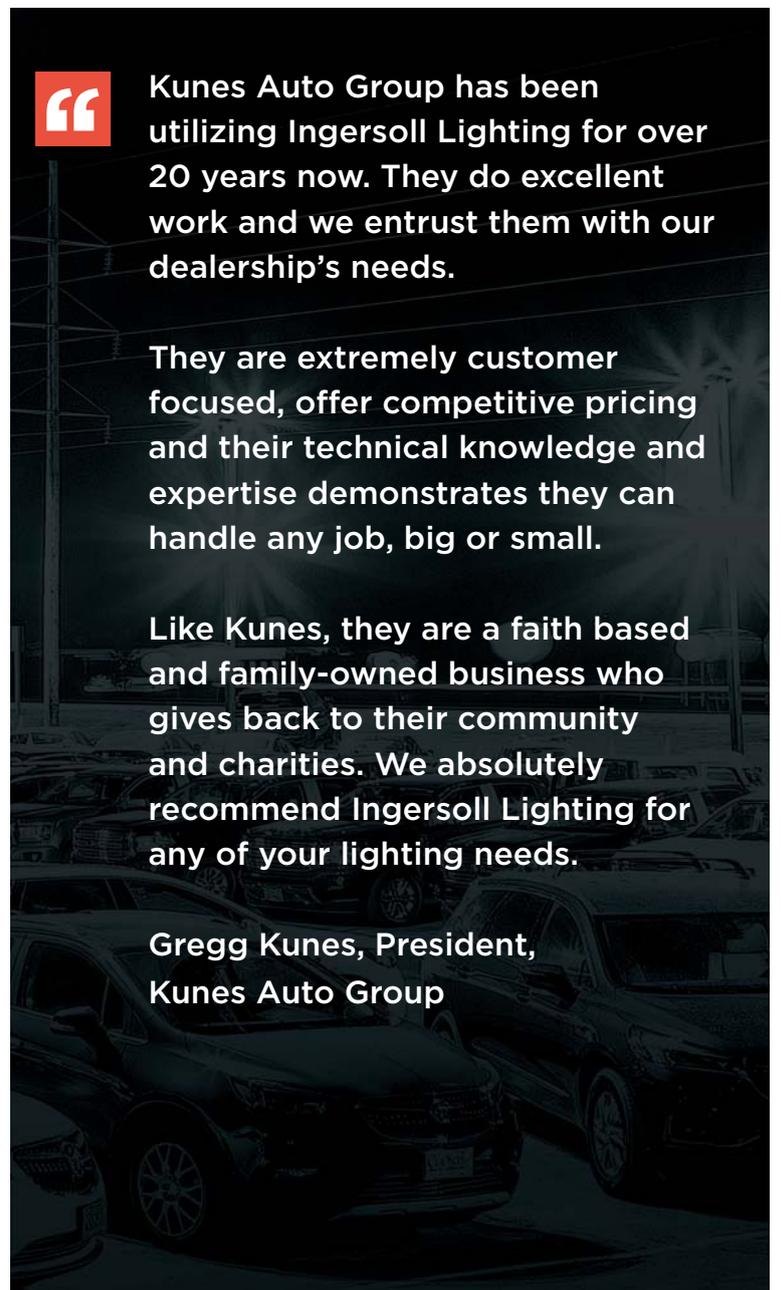

Kunes Auto Group has been utilizing Ingersoll Lighting for over 20 years now. They do excellent work and we entrust them with our dealership's needs.

They are extremely customer focused, offer competitive pricing and their technical knowledge and expertise demonstrates they can handle any job, big or small.

Like Kunes, they are a faith based and family-owned business who gives back to their community and charities. We absolutely recommend Ingersoll Lighting for any of your lighting needs.

INGERSOLL LIGHTING LLC

CUSTOM SOLUTIONS, QUALITY CARE.

MEET TODD OUR PRESIDENT & CEO

In 1990, Todd Ingersoll was led by the Lord to work towards starting his own faith-based company founded on honesty, integrity, generosity, and a customer-first mindset. He went on to manage and operate companies for the next 11 years until he took a leap of faith and started Ingersoll & Co out of his garage in 2001. Over the next 14 years, the company grew into six divisions: Irrigation, Architectural Lighting, Plumbing, Snow Removal, Christmas Decorating, and LED Lighting.

In 2013 the Milwaukee Gaslight Building asked Todd to redesign the lighting on the inside of the flame that topped their 20-story building. By converting the entire system to LED, Todd was able to reduce their operating expenses from \$3,500 per month to \$35.

That was the beginning of Ingersoll Lighting. Since 2014 our team has been providing commercial and industrial LED lighting solutions, growing from a modest start-up to a nationwide provider. From our expert team to strategic partners, we are committed to offering premium large-area LED lighting solutions with customized plans that deliver immediate improvement to your bottom line while reducing your energy with zero maintenance.

The success of our clients is our top priority, so we don't settle for anything less than the best products and people. Our commitment to excellence works in your favor by maximizing your energy savings as well as your long-term return. That's the Ingersoll Advantage.

GET THE INGERSOLL ADVANTAGE
